Investment Objective

To provide long-term capital growth as a primary goal, with capital preservation as a secondary objective.

Investment Strategy

The portfolio is invested in a growth-oriented mix of securities that seeks to earn a good portion of the long-term growth of the stock market with less volatility. Holdings are diversified primarily among various stock investments, as long as stock market valuations are favorable versus long-term bond yields. A substantial portion of the fund may be invested in long-term, fixed income securities.

The fund manager will adjust the investment mix over time to manage risk by continually evaluating individual securities and market conditions to determine the relative attractiveness of each investment. In general, stock exposure will increase when valuations are low and decrease during speculative markets.

About Risk-Based Funds

Risk-based funds offer professional management and asset allocation through a choice of investment objectives that range from fairly aggressive to fairly conservative. All an investor has to do is determine which objective best suits his or her current risk tolerance and investment time horizon, then decide when to move to a different objective as his or her personal situation changes over the years.

Time Horizon and Range of Stock Exposure

Maximum Term	Extended Term	Moderate Term	Conservative Term
15+ Years	7 - 20 Years	3 - 10 Years	0 - 5 Years
70% - 95%	40% - 70%	20% - 60%	5% - 35%

May be appropriate for investors:

- Who want to be invested in long-term assets without full market risk
- Who have a reasonably high capital risk tolerance

A Word About Risk

All investments involve risks, including possible loss of principal. Because the fund invests in both stocks and bonds, the value of your investment will fluctuate in response to stock market movements and changes in interest rates. Investing in the fund will also involve a number of other risks, including issuer-specific risk, foreign investment risk, and small-cap/mid-cap risk. Investments in options and futures, like all derivatives, can be highly volatile and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. Also, the use of leverage increases exposure to the market and may magnify potential losses.

Performance data quoted represents past performance and does not guarantee future results. Performance for periods greater than one year is annualized. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than that quoted; investors can obtain the most recent month-end performance at www.manning-napier.com or by calling (800) 466-3863. Inception performance is based on the Pro-Blend® Extended Term Series Class S inception of 10/12/1993. For periods through 01/04/2010 (the inception date of the Class L shares), performance for the Class L shares is hypothetical and is based on the historical performance of the Class S shares adjusted for the Class L shares' charges and expenses.

The 40/15/45 Blended Index is 40% Russell 3000® Index (Russell 3000), 15% MSCI ACWI ex USA Index (ACWIxUS), and 45% Bloomberg U.S. Aggregate Bond Index (BAB). Russell 3000 is an unmanaged index that consists of 3,000 of the largest U.S. companies based on total market capitalization. Index returns are based on a market capitalization weighted average of relative price changes of the component stocks plus dividends whose reinvestments are compounded daily. Index returns provided by Bloomberg. ACWIxUS is designed to measure large and mid-cap representation across 22 of 23 Developed Markets countries (excluding the U.S.) and 24 Emerging Markets countries. The Index is denominated in U.S. dollars. The Index returns are net of withholding taxes. They assume daily reinvestment of net dividends thus accounting for any applicable dividend taxation. Index returns provided by Bloomberg. BAB is an unmanaged, market value-weighted index of U.S. domestic investment-grade debt issues, including government, corporate, asset-backed and mortgage-backed securities with maturities of one year or more. Index returns provided by Intercontinental Exchange (ICE). The returns of the indices do not reflect any fees or expenses. Returns provided are calculated monthly using a blended allocation. Because the fund's asset allocation will vary over time, the composition of the fund's portfolio may not match the composition of the comparative Indices.
